

Want to pay less interest on your home loan?

Everyday Offset Account guide

This guide will help you understand more about Everyday Offset Account and how it works.

Key considerations for an Everyday Offset Account

An Everyday Offset Account is a transaction account that's linked to your eligible variable rate Home Loan or Investment Home Loan. Money you put into your Everyday Offset Account (e.g. your salary and savings) reduces the balance on which we charge interest. This means you'll only be paying interest on the difference.

Eligibility

- Available to personal borrowers with an eligible variable rate Home Loan or Investment Home Loan.
- An Everyday Offset Account must be in the same name(s) as the borrowers on the linked eligible home loan. You can open or switch an existing eligible transaction account in your name or jointly with your co-borrower(s).
- For Standard Variable Rate home loans, multiple Everyday Offset Accounts can be linked to an eligible loan.
- For Simple Home Loans, up to two Everyday Offset Accounts can be linked to an eligible loan.
- For Digi Home Loans, one Everyday Offset Account can be linked to an eligible loan.

Benefits

- An Everyday Offset Account can help you pay less interest and reduce the time it takes to pay off your home loan.
- For Standard Variable Rate home loans, you can link multiple Everyday Offset Accounts (these can be individual and/or joint names) to your eligible home loan. For example, you and your partner can each have your own account, and the balances in both will work together to help reduce the interest on your joint home loan. It's a flexible way to manage your money while helping you save on interest.
- For Digi Home Loans, you can link one (but no more than one) Everyday Offset Account to an eligible loan. A \$10 monthly Offset Feature fee applies.
- For Simple Home Loans, you can link up to two Everyday Offset Accounts to an eligible loan. A \$10 monthly Offset Feature fee applies.
- You can access your money using your Debit Mastercard – in branch, online with NetBank, or on the go with the CommBank app.
- No minimum balance is needed in your Everyday Offset Account for it to help reduce the interest charged on your eligible home loan.

Product Features

- Your Everyday Offset Account may take up to 5 business days to be linked to your eligible home loan.
- An Everyday Offset Account can only be linked to one eligible home loan at a time.
- No interest is earned on the balance of your Everyday Offset Account, even if it exceeds the balance of the home loan.
- Interest isn't charged on the part of the home loan balance equal to the balance of the linked Everyday Offset Accounts.
- The below transaction accounts can be switched to an Everyday Offset Account. By doing so, means you are able keep your existing account number without changing anything.

Complete Access		Smart Access		Streamline Basic	
Viridian Line of Credit		NetBank Saver		GoalSaver	AwardSaver
Cash Investment Account		Cash Management Call Account		Private Bank Account	

Financial

- Funds in an Everyday Offset Account (up to the balance of the eligible home loan) will offset the balance of the home loan, helping you save on interest.
- For Digi and Simple Home Loans, a \$10 monthly Offset Feature fee applies per eligible loan.

How does it work?

Here's an example to help explain the Everyday Offset Account.

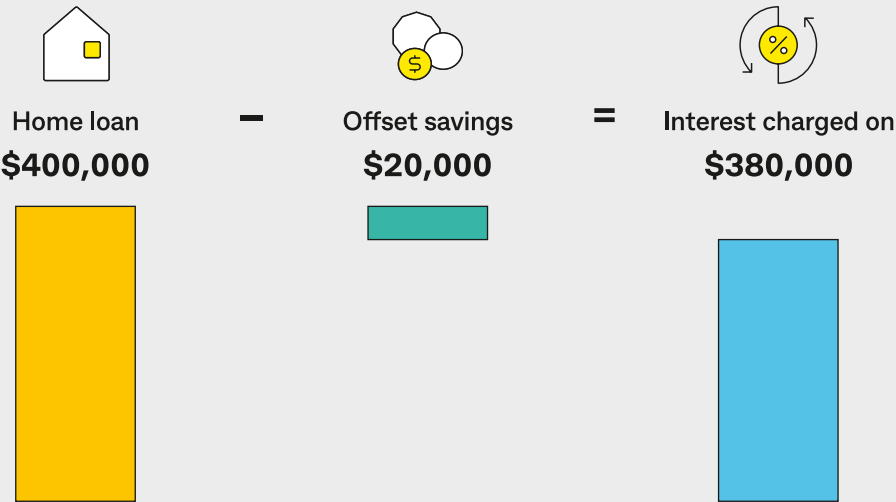

Meet Adam and Aria

Adam and Aria have a **\$400,000** Standard Variable Rate home loan and currently have **\$20,000** in their linked Everyday Offset Account. This means they only pay interest on **\$380,000** instead of **\$400,000**.

Interest on a home loan is calculated based on its closing balance each day. Every cent of the closing balance (up to the balance of the linked home loan) in your Everyday Offset Account is used to reduce or 'offset' the balance owing on your linked home loan when calculating interest. The more money you have in your Everyday Offset Account, the less interest you'll pay on your home loan.

Adam and Aria's home loan interest rate is 6.50% p.a. and they maintain a \$20,000 balance in their Everyday Offset Account over 30 years. This means they saved \$102,235¹ in interest over the life of their home loan. This also resulted in allowing them to pay off their home loan 4 years early.

TIP: Not everyone has large sums of money sitting in their account. By simply depositing your salary into your Everyday Offset Account, you could pay less interest and potentially pay off your home loan sooner.

¹ This example is for illustrative purposes only. It assumes Adam and Aria don't have a Wealth Package and make monthly Principal and Interest repayments. It also assumes their interest rate remains unchanged over the life of the loan, and only an initial \$600 loan establishment fee and monthly \$8 fees are charged. No additional repayments or redraws are made.

Common questions

<p>How do I set up an Everyday Offset Account?</p>	<p>If you don't already have an existing eligible transaction account, you'll need to open an Everyday Account Smart Access first:</p> <ol style="list-style-type: none"> 1. Log on to NetBank 2. Search 'Offset' in the search bar and select 'Manage my offset' from the dropdown menu 3. Click on the 'Open Smart Access account' button and follow the instructions to open a Smart Access transaction account 4. Switch your transaction account to an Everyday Offset Account using the instructions below <p>Switch your Smart Access account to an Everyday Offset Account:</p> <ol style="list-style-type: none"> 5. Search 'Offset' in the search bar and select 'Manage my offset' from the dropdown menu 6. Click on the 'Link an offset' button 7. Confirm your home loan and select the eligible transaction account to switch 8. Click 'Link' to complete the process
<p>What's the difference between an Everyday Offset Account and a savings account?</p>	<p>Whilst an eligible savings account will earn you interest on any money you have in your account, an Everyday Offset Account allows you to save interest on your linked home loan by offsetting the home loan balance.</p> <p>Interest is not earned on the balance of the Everyday Offset Account, even if the balance exceeds the balance of the home loan.</p>
<p>What's the difference between an Everyday Offset Account and a redraw facility?</p>	<p>An Everyday Offset Account can be linked to your home loan, whereas redraw is a feature of your eligible variable rate home loan. Both can help:</p> <ul style="list-style-type: none"> • Reduce the amount of interest you pay on your home loan • Pay off your home loan sooner <p>Redraw allows you to withdraw the amount that you're ahead on your loan. For weekly and fortnightly direct debit payers, the available redraw balance will not include repayments made towards your next monthly minimum repayment. You can't set up direct debits or pay bills directly from your redraw. The money must be transferred to an everyday transaction account before you can use it.</p> <p>The money in your redraw account may reduce over the life of your loan so that by the end of your agreed loan term, both your loan balance and the available redraw will be zero. If you're using a redraw facility to deposit money that you plan on using later, an Everyday Offset Account may better suit your needs.</p> <p>For more information on Redraw go to commbank.com.au/home-loan-redraw</p>
<p>How much will I be charged for linking an Everyday Offset Account to my Digi or Simple Home Loan?</p>	<p>A \$10 monthly Offset Feature fee applies to each home loan account where an Everyday Offset Account is or has been linked to a Digi or Simple Home Loan any day during the repayment period.</p> <p>For Simple Home Loan, the Offset Feature fee is \$10 each month whether you have one or two Everyday Offset Accounts linked.</p>
<p>If I have multiple Digi or Simple Home Loans, each with a linked Everyday Offset Account, do I pay multiple Offset Feature fees?</p>	<p>Yes, a \$10 monthly Offset Feature fee applies to each home loan account with an Everyday Offset Account linked.</p>
<p>What happens when I link a different Everyday Offset Account to my Digi or Simple Home Loan?</p>	<p>If you link and unlink different Everyday Offset Accounts to one Digi or Simple Home Loan during the repayment period, you will only be charged one \$10 monthly Offset Feature fee for that home loan account.</p> <p>However, if you unlink and link an Everyday Offset Account(s) between two different eligible loans during the repayment period, you will be charged a \$10 monthly Offset Feature fee for each home loan account.</p>

Will a linked Everyday Offset Account affect the minimum required amount I need to repay on my home loan?	No, the minimum required amount is not affected by a linked Everyday Offset Account. However, by calculating interest on a reduced loan balance, a larger portion of your repayments will go towards paying off the principal. This means you save money on interest and repay your home loan faster.
What happens to my Everyday Offset Account if I switch to a non-eligible home loan?	Your Everyday Offset Account will unlink and no longer offset your home loan. The Everyday Offset Account will revert to a Smart Access account within 45 calendar days. You can link the Everyday Offset Account to another eligible home loan via NetBank.
What happens to my Everyday Offset Account if I switch between eligible variable rate home loans?	<p>If you switch between eligible variable rate home loans (with the exception of switching into a Simple Home Loan), your Everyday Offset Account(s) will remain linked.</p> <p>For Simple Home Loans, if there are more than two Everyday Offset Accounts linked to the loan after it is switched to a Simple Home Loan, we will delink the excess number. Please refer to the <u>'Switching Terms and Conditions'</u> for details on how we determine which Everyday Offset Accounts will be delinked.</p> <p>Depending on your loan type, an Offset Feature fee may apply. Refer to the <u>'Fees we charge for consumer mortgage lending products'</u> for the fee details.</p> <p>Log on to NetBank if you wish to link your Everyday Offset Account to another eligible home loan</p>
What happens if my Everyday Offset Account balance is greater than my current linked home loan owing balance?	If the balance of your Everyday Offset Account is more than what you owe on your home loan, then only the interest on the amount up to the loan balance will be offset. No interest is earned on any money held in an Everyday Offset Account even if the balance exceeds the outstanding home loan balance.
